PROFESSIONAL SUMMARY

Final-year MIA&GE Bachelor's student at the International University of Casablanca with a solid technical foundation in software engineering and data systems. Demonstrated proficiency in Python, Java, SQL, TensorFlow, and Azure through the development of AI-driven solutions, including predictive models like the Delaney Sustainability Prediction tool. Experience as an AI/Data Engineer intern at BRAMS involved leading a project that integrated Retrieval Augmented Generation with enterprise data using LangChain and LlamaIndex on Azure Machine Learning Studio. Aspires to leverage expertise as a Machine Learning Engineer in healthcare and finance while pursuing a PhD in Neural Networks to drive innovation in AI applications.
